

"D" System Keg Valve

"D" System - Draft Beer Keg Coupler - Tap with Black Wing Handle

"D" system is the most common system available in the US, also known as American Sankey. It is used by all the major breweries - Anheuser-Busch, Miller, Molson-Coors, and Labatt as well as most craft breweries. Please see page 2 for an expanded listing of beers that use the "D" system valve.

The keg coupler connects to the keg valve, "tapping" the keg. Both the gas line from the CO₂ tank / regulator and the beer hose to the beer faucet attach to the coupler.

Keg Coupler Features

- Chrome plated forged brass body
- Chrome plated probe
- Compact design works well on smaller diameter 1/6 kegs

Specifications

System	"D" (American Sankey)
