

"A" System Keg Valve

"A" System - Keg Coupler - Tap w/ Ergo Lever Handle

"A" system is commonly referred to as the German Slider because it slides onto the valve face. It is used by breweries such as Hoegaarden, Paulaner, Spaten, and Warsteiner. Please see our website for an expanded listing of beers that use the "A" system valve.

The keg coupler connects to the keg valve, "tapping" the keg. Both the gas line from the CO₂ tank / regulator and the beer hose to the beer faucet attach to the coupler.

Keg Coupler Features

- Slide on keg connection
- 304 Stainless steel probe. Excellent for beer, wine or cider
- Easy to engage handle: push down to tap/pull up to untap
- Short handle ideal for 1/6th barrel kegs and keg with a rubber chime
- PRV (pressure relief valve)

Specifications

System	"A"
Products	Warsteiner / Spaten / Paulaner / Hoegaarden
Handle Color	Black
Handle Style	Ergonomic Lever Handle
Gas Port	3/8" O.D. Barb (To fit 5/16" I.D. Gas Hose)
Beer Port	7/8"-14 Thread (U.S. Beer Industry Standard)
Height	5-3/16"
