

"M" System Keg Valve

"M" System - Keg Coupler - Tap w/ Ergo Lever Handle

"M" System Recently introduced to the U.S. market. Body is the same as the German Slider, but the probe configuration is unique. It is used by breweries such as Schneider, Aventinus, and Einbecker. The "M" system should not be confused with the "A" system German slider that is used by the majority of German breweries. Please see our website for an expanded listing of beers that use the "M" system valve.

The keg coupler connects to the keg valve, "tapping" the keg. Both the gas line from the CO₂ tank / regulator and the beer hose to the beer faucet attach to the coupler.

Keg Coupler Features

- Slide on keg connection
- Stainless steel probe
- Easy to engage: push down to tap/pull up to untap

Specifications

System	"M"
Products	Schneider / Aventinus / Einbecker
Handle Color	Black
Handle Style	Ergonomic Lever Handle
Gas Port	3/8" O.D. Barb (To fit 5/16" I.D. Gas Hose)
Beer Port	7/8"-14 Thread (U.S. Beer Industry Standard)
Height	5-3/16"
Probe Seal Material	EPDM
