

PRO-MAX Drain Bottle

Every installed **PRO-MAX (FOB)** needs to be plumbed to a drain. When the PRO-MAX is reset with a full keg, the gas vent blow-off contains liquid - this waste needs to be captured and discarded. The **PRO-MAX Drain Bottle** wall mount container makes a convenient drain receptacle if sewer line is not reachable in the walk-in cooler.

PRO-MAX-DB

Features:

- Sealed drain bottle for PRO-MAX (FOBs).
- Convenient mounting bracket.
- Pre-drilled hole in cap for drain hose.
- Easily removable container for dumping in sink.
